

Hi all's

Let me tell you my trip in Lotus Europa Country, at Europa sorcerer home: Richard Winter.

- Apologies for mistakes,
- All pics are taken with Richard agreement

The best way for me to choose correctly spare parts to fix my car, and to understand lot of "hand help" is to go in Banks Station.

In little town, the first AD you find, is this. The goal of my trip.

Richard 'sRace car van.

Now: some pics from banks Station show room,

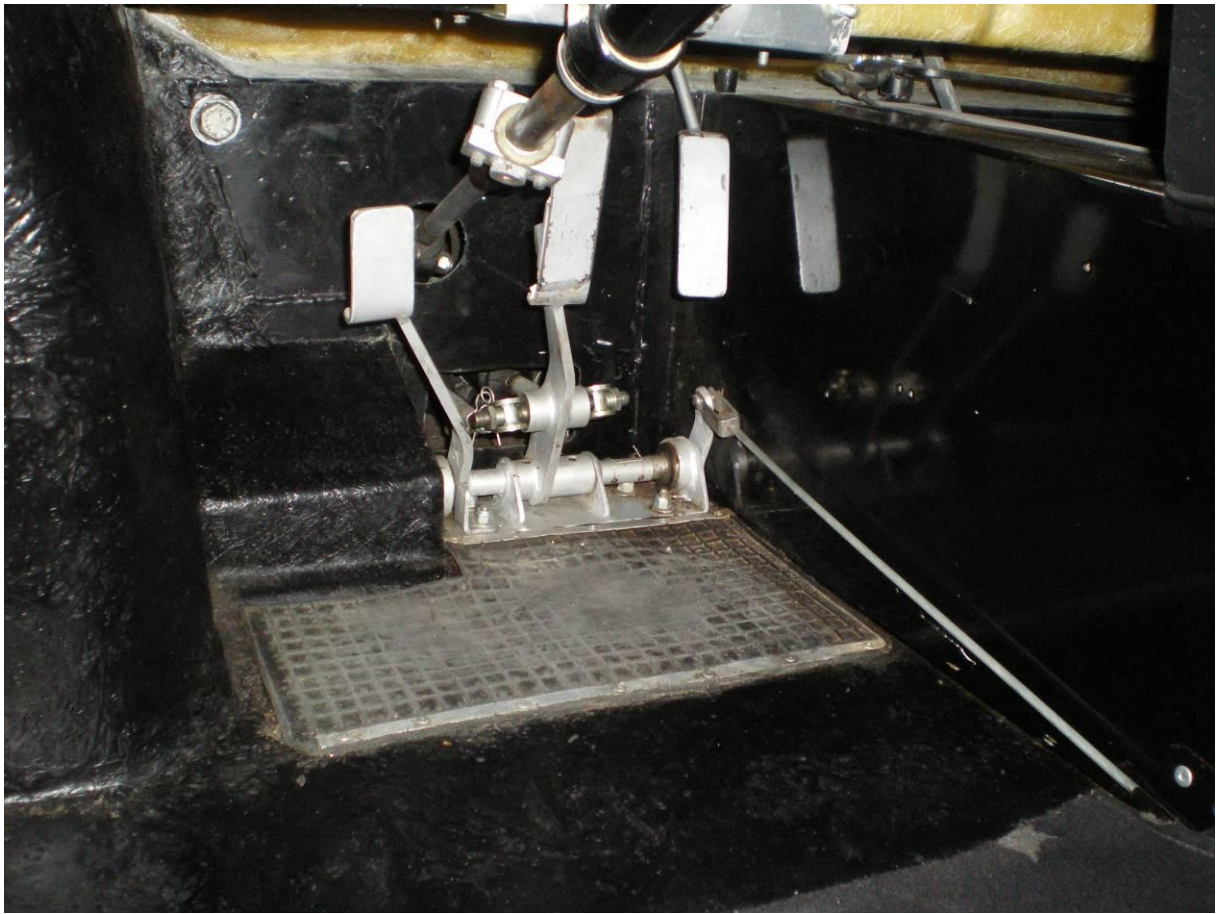

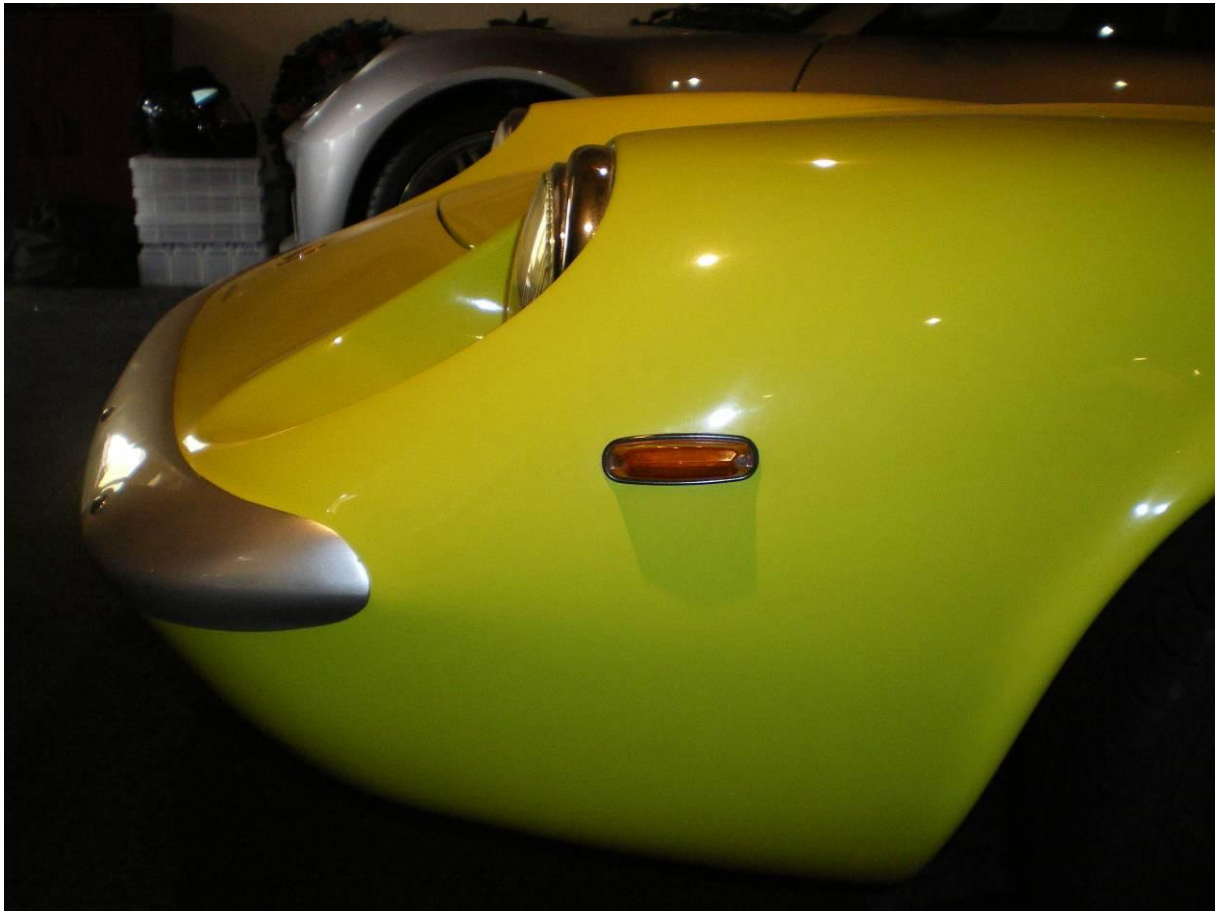

Some details from this S1

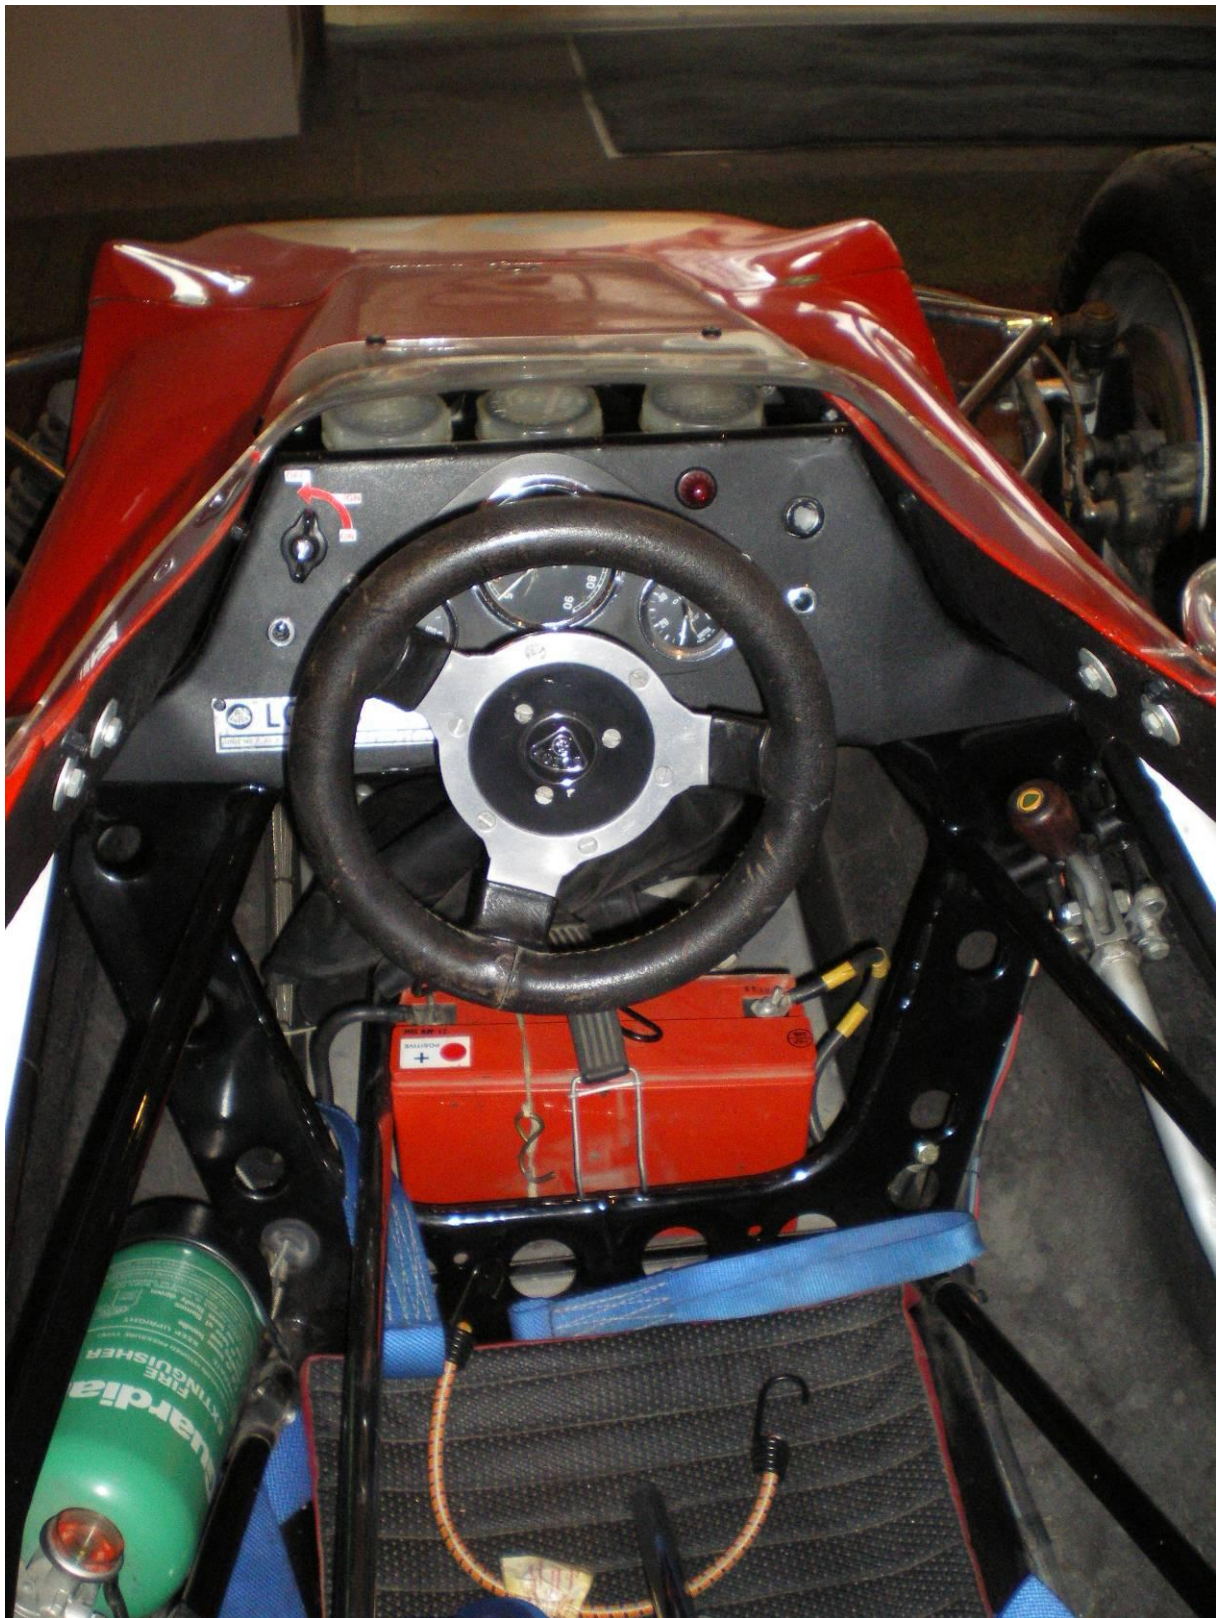

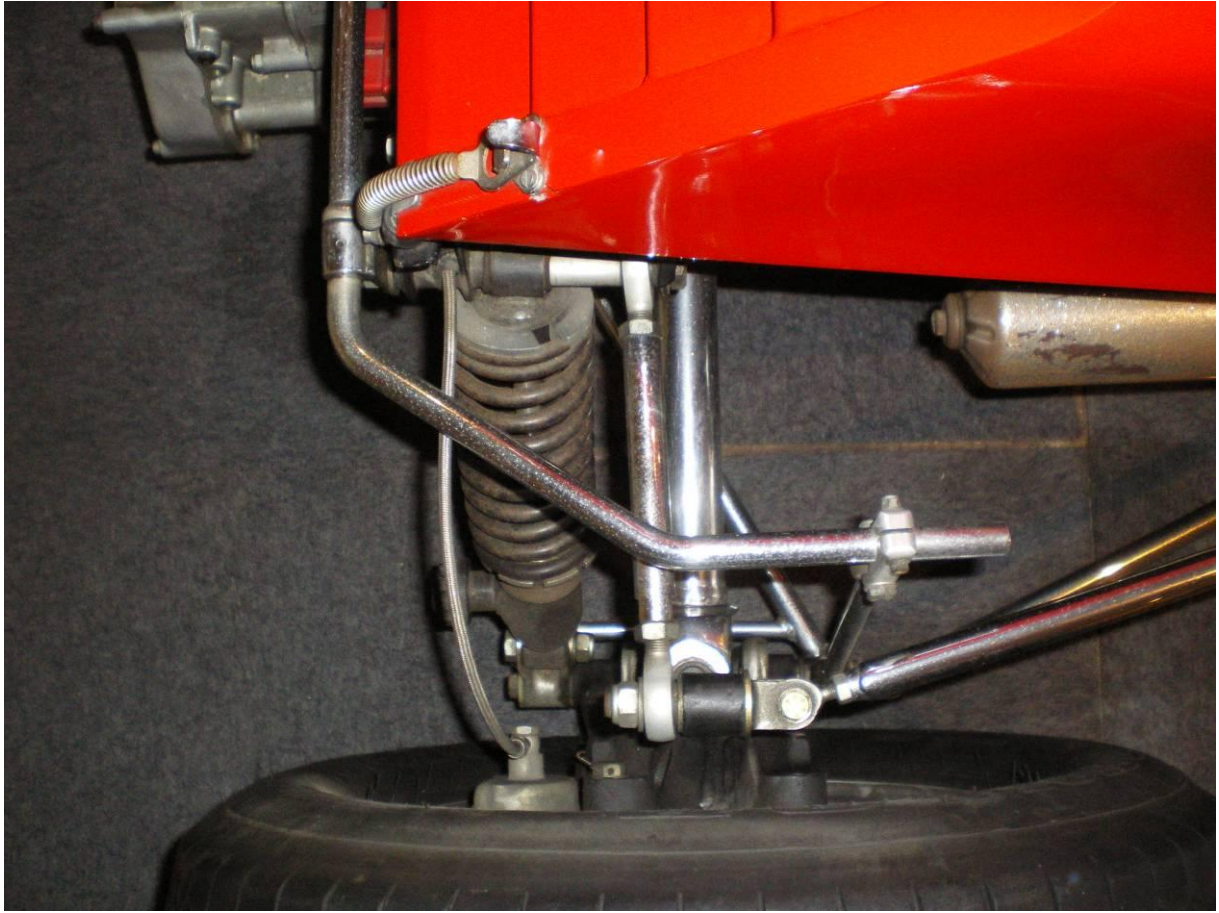

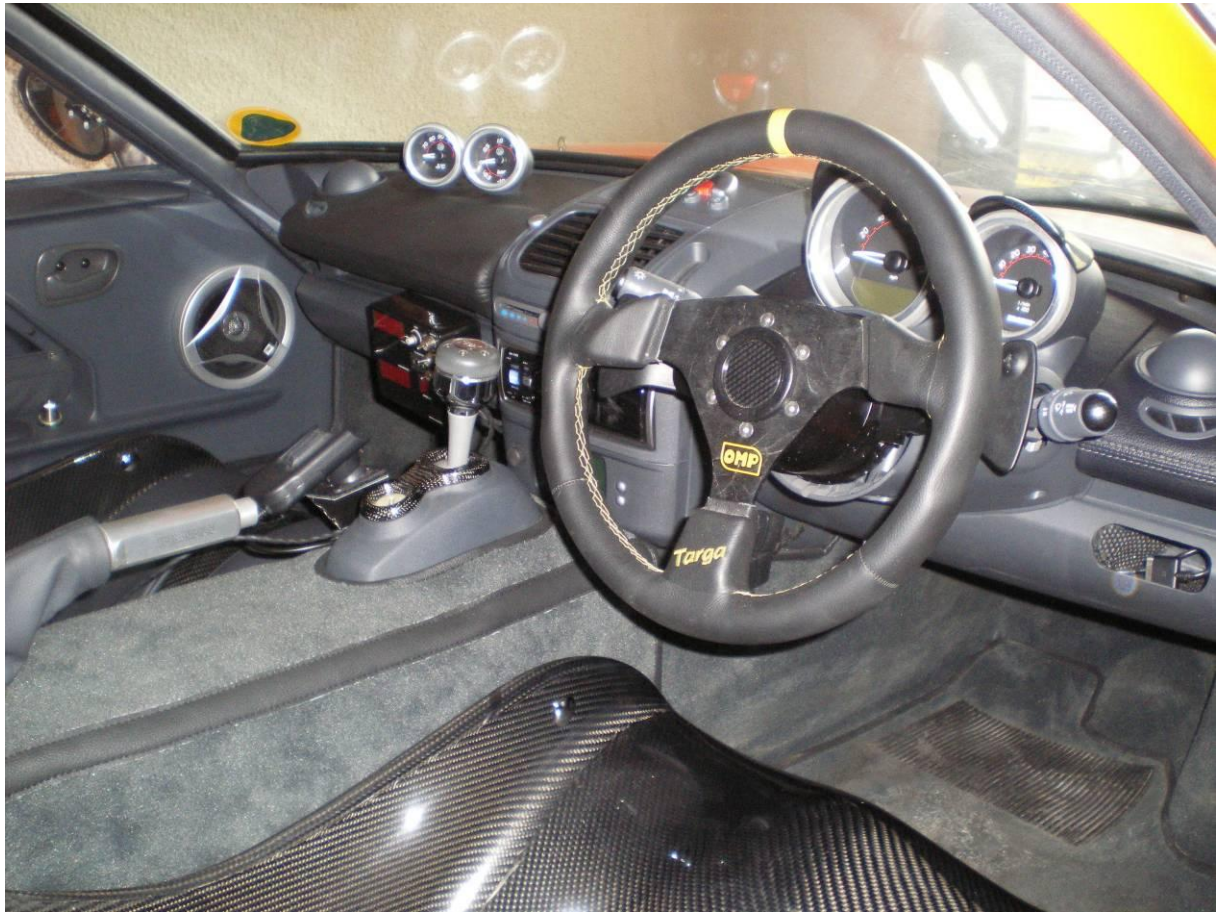

This europa is richard prototype, I don't remember exactly the engine , perhaps vauxhall, but inside is completely different of europa classic

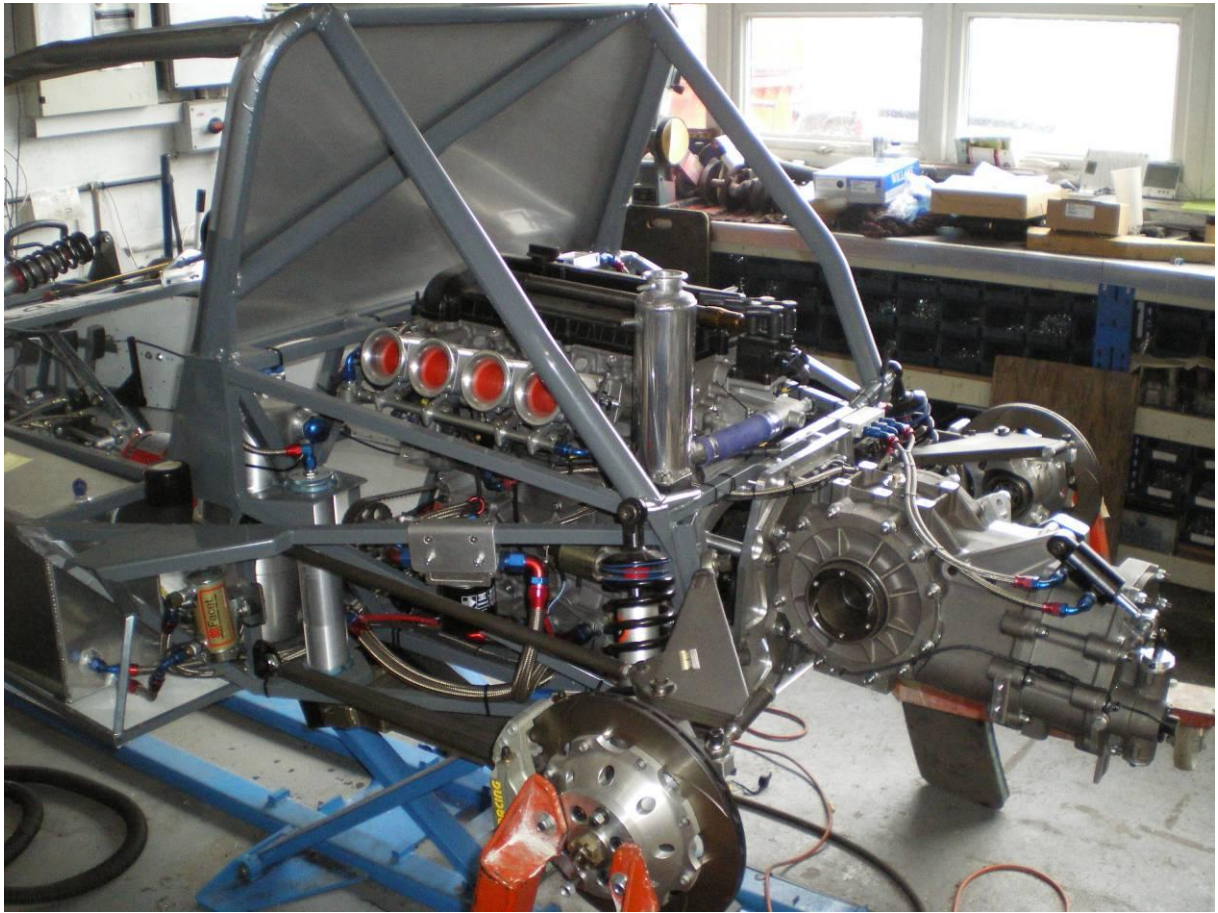

Now we are going to Banks work shop

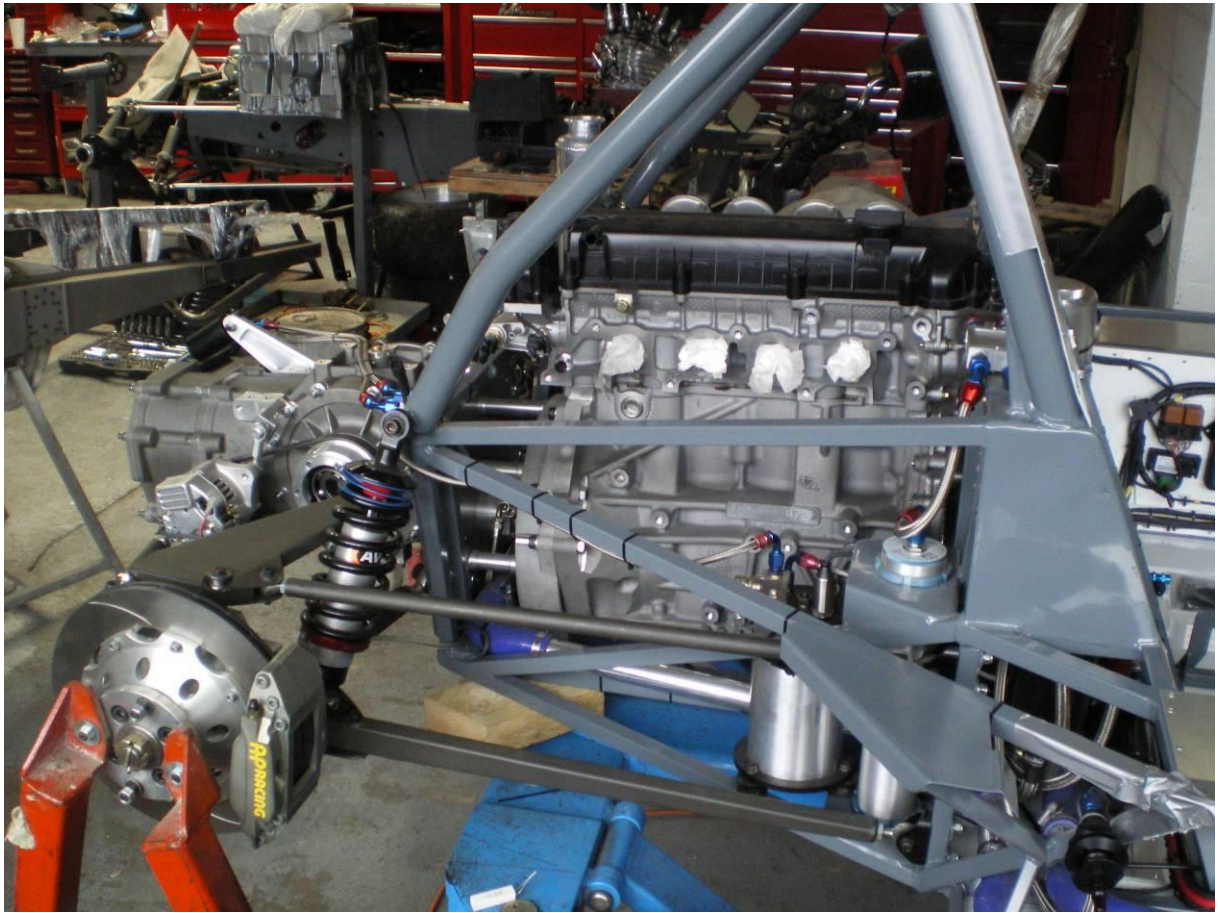

To perform a chassis, you need a table sorry in English , in French is a *marble*

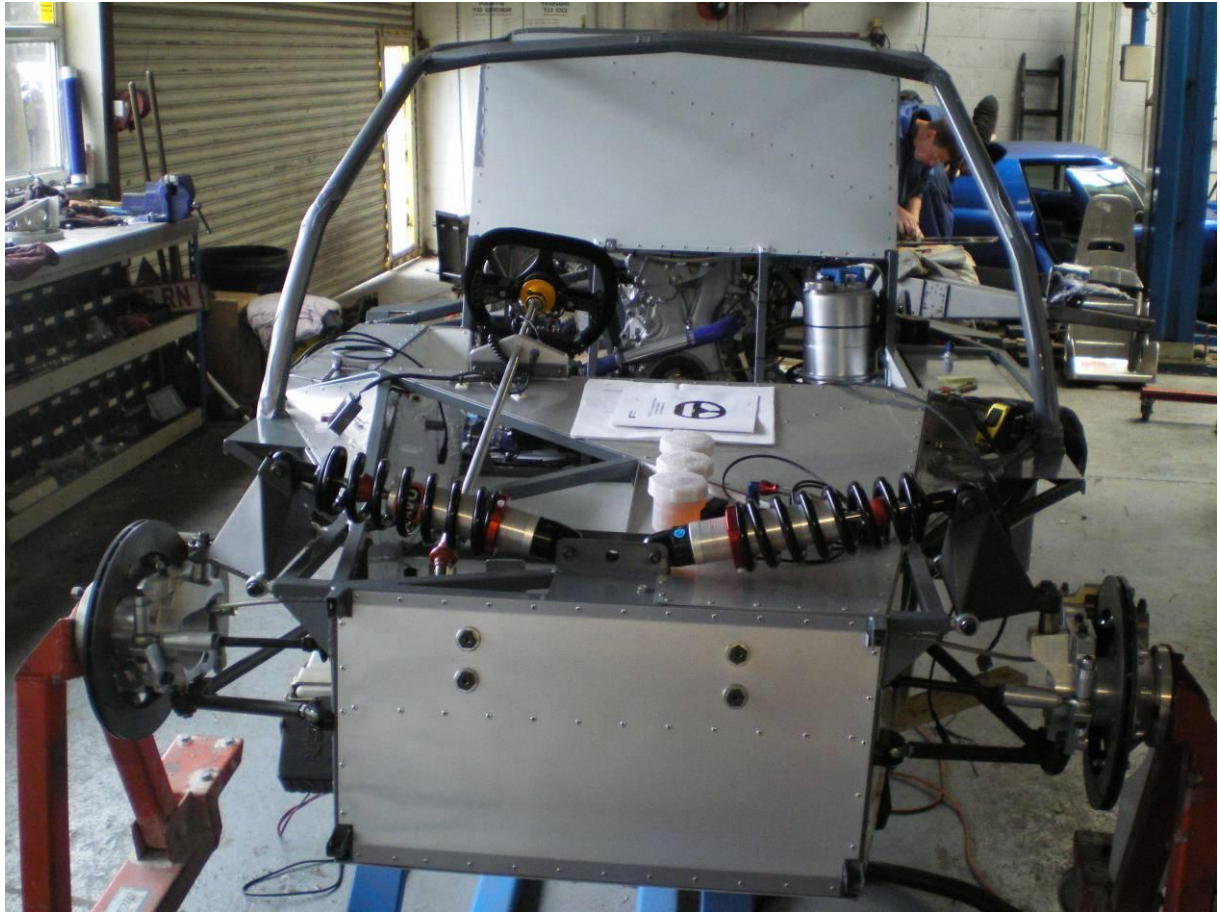

Is so nice when is new, clean a dream isn't it ?

Some works on an Europa

We have been a joke about hammer using!

Richard, with new chassis for which ?

This is my chassis

Behind workshop, the cemetery

Well this trip was for me full of technical instructions and friendship. Richard was kindly with my poor English and gives it to me confidence to my refurbish.

After this trip, 17 months of work, and now I 'am on the road
